

## Data Centre Consultant (Design & Construction) Associate Director

**Reports to:** Director  
**Location:** London/Flexible

**Department:** Technical Services  
**Salary:** £80k-£90k + bonus

### Join us VIPA Digital

We're not your usual consultancy. We're a growing, entrepreneurial advisory firm specialising in the data centre industry, working with investors, developers, operators and enterprise clients on high-impact international projects.

We're looking for a **Data Centre Consultant** to join our collaborative and forward-thinking team. If you come from a **design, construction, and engineering** background and want to apply your experience across a broad range of client-facing, strategic, and technical advisory work – this could be the role for you.

At VIPA Digital, we invest in our people, champion a strong and inclusive culture, and offer a flexible working environment built on trust, autonomy, and shared success.

### About the role

As a **Data Centre Consultant**, you'll play a key role in supporting the delivery of advisory engagements across the full lifecycle of data centre development — from early site selection and feasibility through to design management, supply chain procurement, construction oversight, and commissioning strategy.

You will act as a trusted advisor to our clients, helping them navigate technical, commercial, and delivery-related decisions that are fundamental to the success of their digital infrastructure investments.

### Responsibilities

- Advise clients on the design and program delivery of data centre developments.
- Support or lead engagements spanning technical due diligence, feasibility assessments, design oversight, procurement support, and construction strategy.
- Provide subject matter input across MEP systems, layouts, infrastructure resilience, phasing strategies, and buildability.
- Coordinate with multidisciplinary teams, including design consultants, PMs, engineers, and client stakeholders.
- Develop high-quality deliverables including client reports, technical memos, design reviews, and risk assessments.
- Stay current on market trends, technology innovation, and industry standard
- Represent VIPA Digital in client meetings, industry events, and project workshops.

### What we are looking for

---

- 5–10+ years' experience in data centre design, construction or project delivery, ideally in an operator, engineering or contractor environment.
- Proven understanding of critical systems design (mechanical, electrical, cooling, etc.) and data centre delivery best practices.
- Strong communication and client-facing skills, with the ability to present complex ideas clearly.
- A proactive mindset with an ability to adapt, learn, and solve problems in dynamic environments.
- Comfortable working across multiple projects and collaborating with diverse teams.
- Degree-qualified in Engineering, , or a related discipline (Chartered status a plus).

### Why VIPA Digital?

- **People-First Culture:** We're a values-led team that genuinely invests in your personal and professional growth.
- **Real Impact:** Work on high-profile, meaningful projects influencing the future of global digital infrastructure.
- **Flexibility & Trust:** We offer hybrid working and a grown-up approach to how work gets done.
- **Entrepreneurial Energy:** We're building something special — and you can help shape it.

### Ready to Join Us?

If you're looking for more than just a job — and want to join a team where your ideas, experience and ambition are valued — we'd love to hear from you.

Please send your CV and a short note on why you're interested to [info@vipadigital.com](mailto:info@vipadigital.com)
